Residual Functional Capacity Questionnaire
CHRONIC FATIGUE SYNDROME

Patient: _____________________________________________________________________________
DOB: _______________________________________________________________________________

Physician completing this form:  __________________________________________________________

Please complete the following questions regarding this patient's impairments and attach all supporting
treatment notes, radiologist reports, laboratory and test results.

Symptoms & Diagnosis
Does your patient have Chronic Fatigue Syndrome?  □ Yes  □ No

What other diagnoses has this patient received? ____________________________________________

Describe the patient's symptoms, such as pain, dizziness, fatigue, etc. ___________________________
____________________________________________________________________________________
____________________________________________________________________________________
____________________________________________________________________________________

Does the patient have chronic pain/paresthesia?  □ Yes  □ No

Describe the patient's type of pain, location, frequency, precipitating factors, and severity. ____________
____________________________________________________________________________________
____________________________________________________________________________________
____________________________________________________________________________________

Mark all of the following symptoms this patient exhibits concurrently, have persisted or recurred during
six+ consecutive months, and did not predated the fatigue.
□ Headaches of a new type, pattern or severity
□ Malaise lasting more than 24 hours after physical exertion.
□ Muscle pain
□ Non-restful sleep
□ Joint pain that affects multiple joints without swelling or redness
□ Short term forgetfulness or lack of concentration that causes substantial reduction in occupational,
educational, social or personal activities
□ Sore throat
□ Tender cervical or axillary lymph nodes

Does your patient have unexplained persistent or recurring chronic fatigue that is new or of definite onset,
is not the result of ongoing exertion, and results in substantial reduction in previous levels of occupational,
educational, social, or personal activities?  □ Yes  □ No
  If yes, please describe the patient's history of fatigue. _______________________________________
____________________________________________________________________________________
____________________________________________________________________________________

What is the earliest date that the above description of limitations applies? ________________________

Have these symptoms lasted (or are they expected to last) twelve months or longer?  □ Yes  □ No
Are this patient’s symptoms and functional limitations impacted by emotional factors?  □ Yes  □ No
If yes, please mark any known psychological conditions that affect this patient’s pain:
□ Depression  □ Anxiety  □ Somatoform disorder  □ Personality disorder
□ Other: _____________________________________________________________________

Are these physical and emotional impairments reasonably consistent with the patient’s symptoms and functional limitations?  □ Yes  □ No
If no, please explain: ____________________________________________________________

Testing & Treatments

Mark all of the following medical signs that have been clinically documented over a period of at least six consecutive months.
□ Non-exudative pharyngitis
□ Palpably swollen or tender lymph nodes
□ Persistent reproducible muscle tenderness on repeated examinations, including positive tender points

Mark all of the following laboratory findings that apply to this patient.
□ Elevated antibody titer to Epstein-Barr virus (EBV) capsid antigen equal to or greater than 1:5120, or early antigen equal to or greater than 1:640
□ Abnormal MRI brain scan
□ Neuromuscular hypotension as shown by tilt table testing or other form of testing

List any other medically accepted laboratory findings that are consistent with the patient’s symptoms.____________________________________________________________________________________

Identify any additional positive clinical findings and test results, such as abnormal exercise stress test or abnormal sleep studies: ____________________________________________________________

Please list all diagnoses that have been excluded as the cause of this patient’s fatigue, such as HIV-AIDS, malignancy, parasitic disease, psychiatric disease, rheumatoid arthritis, drug or alcohol addiction, medication side effects, etc.____________________________________________________________________________________

Mark all of the following mental findings that have been documented about this patient by mental status examination or psychological testing.
□ Anxiety  □ Concentration limitations  □ Comprehension problems
□ Depression  □ Information processing limitations  □ Short term memory deficit
□ Visual-spatial difficulties

List any other mental findings that suggest persisting neurocognitive impairment.____________________________________________________________________________________

Please list the patient’s current medications:____________________________________________________________________________________
Please indicate the treatment type, start dates, and frequency: ____________________________________________________________
______________________________________________________________________
____________________________________________________________________________________

List all attempted treatments and medications, the patient’s response, and exhibited side effects.
_____________________________________________________________________________________________________________________
_____________________________________________________________________________________________________________________

What is the patient’s prognosis? __________________________________________________________

Is this patient a malingering? □ Yes □ No

**Functional Work Limitations**

When answering the following questions, please consider this patient’s impairments and estimate his or her ability to work in a competitive work environment for an 8-hour shift with normal breaks.

How often do you expect this patient’s fatigue or other symptoms to interfere with the attention and concentration necessary to perform simple work tasks?
□ Never
□ Rarely (1% to 5% of an 8 hour working day)
□ Occasionally (6% to 33% of an 8 hour working day)
□ Frequently (34% to 66% of an 8 hour working day)
□ Constantly

How well do you expect this patient to be able to tolerate work stress?
□ Incapable of even "low stress" jobs
□ Only capable of low stress jobs
□ Moderate stress is okay
□ Capable of high stress situations

Explain: ______________________________________________________________________
_____________________________________________________________________________

Is this patient taking any medications with side effects that may affect his or her ability to work?
□ Yes □ No

If yes, please list possible side effects. ______________________________________________
_____________________________________________________________________________

How far can this patient walk without rest or severe pain? __________________________________________

How long can this patient sit comfortably at one time before needing to get up?
Minutes: 0 5 10 15 20 30 45
Hours: 1 2 Longer than 2
What must the patient usually do after sitting this long?
□ Stand □ Walk □ Lie Down □ Other: ______________________

How long can this patient stand comfortably at one time before needing to sit or walk around?
Minutes: 0 5 10 15 20 30 45
Hours: 1 2 Longer than 2
What must the patient usually do after sitting this long?
□ Sit □ Walk □ Lie Down □ Other: _______________________
How long can this patient sit in an 8-hour working day?
- less than 2 hours
- about 2 hours
- about 4 hours
- at least 6 hours

How long can this patient stand and/or walk in an 8-hour working day?
- less than 2 hours
- about 2 hours
- about 4 hours
- at least 6 hours

Does this patient require a job that allows the opportunity to change between sitting, standing and walking at will?  □ Yes  □ No

Might the patient require unscheduled breaks?  □ Yes  □ No
- If yes, how many times?  1  2  3  4  5  6  7  8  9  10  >10
- For how many minutes?  <5  10  20  30  45  60  90  >90

During occasional standing/walking, does this patient require a cane or other assistive device?  □ Yes  □ No

How many pounds can this patient lift and carry?
- Never
- Rarely
- Occasionally
- Frequently

<table>
<thead>
<tr>
<th>Less than 10 lbs.</th>
<th>Never</th>
<th>Rarely</th>
<th>Occasionally</th>
<th>Frequently</th>
</tr>
</thead>
<tbody>

Does this patient have significant limitations with repetitive reaching, handling or fingering?
- □ Yes  □ No
- If yes, please indicate the percentage of time this patient can perform the following activities:
  - Using hands to grasp, turn and twist objects
    Right _______% Left _______%
  - Using fingers for fine manipulation
    Right _______% Left _______%
  - Using arms to reach out and overhead
    Right _______% Left _______%

Are this patient’s impairments likely to produce “good days” and “bad days”?
- □ Yes  □ No
- If yes, please estimate, on average, how many days per month your patient is likely to be absent from work as a result of the impairments or treatment:
  - Never
  - About one day per month
  - About two days per month
  - About three days per month
  - About four days per month
  - More than four days per month
Please describe any other limitations that might affect this patient’s ability to work at a regular job on a sustained basis, such as psychological issues, limited vision or hearing, or the inability to adjust to temperature, wetness, humidity, noise, dust, fumes, gases or hazards, etc.

____________________________________________________________________________________

____________________________________________________________________________________

____________________________________________________________________________________

Please describe additional tests or clinical findings not described on this form that clarify the severity of the patient’s impairments.
